**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by Ho et al. (7,031,287).

As per claim 10, Ho et al. disclose a system for seamlessly granting polls by an access point (QAP) for upstream and/or sidestream traffic from at least one station (WSTA) while simultaneously sending downstream traffic from the QAP to the at least one WSTA, the system comprising a virtual frame generator for determining the time instants when the QAP is required to poll the at least one WSTA to transmit the upstream and/or sidestream traffic and a scheduler unit for computing polling and transmission times to poll said at least one WSTA (fig. 6, col. 3/ln. 6-31, col. 12/ln. 61-col. 13/ln. 25).
